

The noble profession

Калачинская Лилия Викторовна МБОУАСОШ №2 г.Акса́й

Teachers are respected worldwide. It`s noble and useful profession but at the same time it`s very complicated and time-consuming. The life of society and country as a whole depends on the teachers, their work and commitment.

I`m deeply convinced that all teachers in my life were of great importance but my primary school teacher has a special place in my heart. Her name is Galina Pavlovna Kosivcova. She taught us all subjects. She taught me to write, to read and a set of different useful rules. Galina Pavlovna loved her pupils and always supported us. She never showed bad attitude to children even when they disobeyed. Her voice was soft, she never spoke loud and tried to respect her pupils in any situation.

A good teacher must possess many qualities: to be creative, hard-working, able to solve problems and make right decisions. A teacher should have a talent as well as an actor. The role of teacher in our life not only to teach, but also make different subjects interesting for pupils. My first teacher could do it perfectly. Her lessons were interesting and informative. It was easy to understand her explanations because she always gave us a lot of bright examples. Galina Pavlovna was so inspiring for her pupils that it was a shame to appear not ready for a lesson. I considered my teacher a real celebrity, lots of students came to visit her, their parents always addressed respectfully and loving her.

I never dreamed of becoming a teacher but my first favourite teacher helped me to choose my future profession. I can`t even express how thankful I am and how much I appreciate her hard work. Galina Pavlovna gave a piece of her soul to each of us. She was the best teacher I ever had. I will always remember her!

Glossary
